## Patient Centered Medical Home

### Your health care is important

Your health care team is committed to you, and we strive to provide you with the best health care possible. Certified as a Patient Centered Medical Home by National Committee for Quality Assurance (NCQA), our physicians lead a team of health care professionals who are responsible for your care. We provide comprehensive, quality health care services to meet your health care needs, and we want to be your partner in your care every step of the way. From scheduling appointments for medical and dental care, to tracking your health care progress, assisting with prescription refills and on-site behavioral health services, we are here for you!

### Your health care team

Your team includes a range of top quality professionals from physicians, nurse practitioners, physician assistants, nurses, medical assistants, patient support staff and health educators. We compliment your medical care with dentists, hygienists, therapists, social workers, dietitians and pharmacists to work together to achieve your health care goals and provide the care you need!

**Having a health care home gives you the chance to:**

- Manage your health care easier with a variety of services available within our clinic
- Be a partner with your health team of experts who care about you and your wellbeing
- Learn what you can do to improve your health

**How to manage your health care:**

- Be sure to bring a list of all medications, vitamins and nutritional supplements you are taking.
- Write down your concerns before you come to your appointment so you can ask questions of your health care team. Prevention and education are keys to learning how best to manage your health.
- If you have been seen by another physician, share this information with your team. Our health care team will work with other physicians to make sure you receive the best care possible.

**Choose OneWorld Community Health Centers to be your health care home!**
