A Message From The President

I am proud that with the fury and confusion of health care reform, Merced Family Health Centers, Inc. continues to be a steady ship in a sea of stormy weather: managed competition, price controls, universal access,

cannery workers, uninsured restaurant cooks, migrant farmworkers, or without homes. It was a pleasure to have continued, yet managed growth, with the addition of more clinicians and new facilities capable of serving more clients. Those new doctors like Teresa Smith, a pediatrician, Brad Bateman, a dentist, and physician assistant Jim Samuelson will improve primary care access to many of our residents. The purchase of an almost new health center in Dos Palos, giving us eight exam rooms, will allow us to double our services in this rural town. The completion of our Patterson Family Health Center within this year and the initiation of a new Childs Avenue Clinic have made 1992 a very good year.

*Board Members:
Alicia DiGochea, Vice President,
Flora Martinez, Treasurer,
John Price, President,
Joe Lozano, Secretary*

capitation, prevention services – we remain committed to providing affordable and accessible primary care to patients in need.

As I look back to 1992, I am always reminded of our MISSION to serve the people whether they are unemployed salesman,

An immediate goal of mine is to complete the Board of Directors roster. We have two consumer vacancies at this time, needed to be filled by caring and hardworking volunteers. Only with the community involved, will health care services be sensitive and responsive to it's needs.

John Price, President
Board of Directors.

The mission of Merced Family Health Centers, Inc. is to provide quality, managed, primary health care services to people in the communities we serve regardless of language, financial, or cultural barriers.

Values:

To meet the needs and expectations of our patients is our highest priority.

To provide the community with responsive primary health care services promptly and courteously.

To provide efficient and effective clinical and administrative management.

To operate under strict budget controls.

To maintain modern health facilities and equipment.

To insure community responsiveness by maintaining our non-profit corporation, governed by a majority of health consumers.

To assure that no one is refused necessary health care services by reason of his/her inability to pay.

To foster mutually beneficial board-staff relationships by encouraging:

- Recruitment, retention of qualified, versatile, and compassionate individuals
- Total quality management
- Excellence and rewarding excellence.

To foster a flexible environment that supports bold and creative solutions to health care needs in a competitive and changing environment.

To increase access through expansion of quality managed primary health care services to underserved areas and populations.

20 years

Expanded Farm Workers Health Program Starts

The expanded Farm Workers' Health Program will begin operation at Merced General Hospital Monday at 5 p.m. with the opening of its clinic.

Formerly operated by the Merced County Public Health Department, the clinic will offer expanded services to the seasonal farm worker and the rural poor.

On four days of the week, the clinic will offer complete medical and diagnostic care, opening at 5 p.m. each day. On Tuesday of each week, the clinic will offer dental services, according to Mike Sullivan, program coordinator.

It all started when an advisory board was formed to look at improving health services to farmworkers. The summer of 1972: learning about the federal migrant health program, a county-hospital project, renting space for a night clinic with part-time doctors. Everyone was part-time in those days, ...it seemed!

The first board members --Flora, Matty, and Rodrigo- hired the first Project Director, who hired the first Doctors -Taylor, Cole, Guettinger. We saw 16 patients on our first night in October 1972, so the newspaper and our memories remind us.

We wanted to do so much: have our own clinic, make our own decisions, get some freedom! Those were the 70's.

In July of 1973, the Department of Health Education and Welfare (HEW) awarded the first grant to the non-profit corporation, Merced Farmworkers Health Project, Inc. It was approximately \$230,000, which included a carry-over from the first year under the hospital.

There were skeptics then: "They'll fail in their first year." There are still some who doubt the will of Merced Family Health Centers, Inc.

1974

Olga Villa Padron with a new patient.

In 1974, we became land owners of eleven acres plus three buildings in Merced - \$50,000. A great deal! The current value of our assets in Merced is at least ten times the original purchase price. We now own

buildings accounting for over 35,000 square feet and no debt.

Ground breaking ceremonies 1974.

In our first year, we served nearly 2,000 patients with medical and dental care, plus outreach services including translation, transportation, and community health education.

In 1975, MFHC became one of only thirteen-approved WIC programs in the State to provide food supplements and nutrition counseling to 500 pregnant women and their children. Today, we serve over 7,000!

750 on Hand for Center Opening

An estimated 750 persons attended the grand opening ceremonies of the Merced Family Health Center, Childs Avenue and N Street, Saturday between noon and 5 p.m. and were treated to a performance by the San Juan Bautista-based Farmworkers' Theater (Teatro Campesino).

Center manager Mike Sullivan, however, said the center did not open its doors to the public today as expected because some construction work still must be completed. He said he expects to open Tuesday at 9 a.m.

The center will provide primary, preventive-type medical and dental care to persons with low incomes, especially migrant farm workers, but is open to anyone, Sullivan said.

Its hours of operation are 9 a.m. to 5:30 p.m. on Monday, Wednesday and Friday and 9 a.m. to 9 p.m. on Tuesday and Thursday. Sullivan said the dental facility will not be open until after New Years Day.

"The Merced Family Health Centers Inc., serve a most significant and important role in the total health care delivery systems of Merced and Stanislaus counties." "The high unemployment rates, and poverty levels experienced in the San Joaquin Valley result in even greater health care needs for those most impacted by poor economic times".

**Michael Ford, M.P.H.,
Merced County Director of
Public Health**

"Merced Family Health Centers contributes to our community as more than a health care provider - they are innovators who focus on improving the quality of life in Merced. Merced Community Medical Center relies on its partnership with MFHC to find creative solutions to today's difficult health care issues".

**William Gilbert, Administrator,
Merced Community Medical Center**

1976

20 years

Expansion to Los Banos came next. In 1976, we received a rural health initiative grant allowing

us to open a clinic.

We named the clinic *Nueva Esperanza* (New Hope). In three short years, we moved into a new clinic, the first California Farmers Home Adminis-

tration funded health center. Tony Coelho, our congressman at the time, was concerned about our impact on the existing health facilities. Some felt we were a threat.

1977

In 1977, the federal government asked us to operate the program in Stanislaus County. They were in transition from a nursing service to a comprehensive program. We agreed to help the local community out. In 1980, we gave the

project back to the local Stanislaus Board of Directors with two operating health centers - Patterson Family Health Center and the West Modesto Medical Clinic.

LB Health Center Opens

LOS BANOS — Keeping Merced County's farmworkers and poor people healthy is the main goal of the new health center which opened here Monday, officials said.

The facility, a branch of the Merced Family Health Center will at first be open from 5:30 p.m. to 9 p.m. Mondays at the Merced County Health Department branch at 925 W. Pacheco Boulevard. Wednesday and Friday night service also will be offered if enough doctors become available.

Officials said they expect to find their own headquarters within a few months. "Hours of attention will be increased to

other nights and days as the need arises," they said.

The center is open to all Merced County residents but focuses on poor people and farmworkers. Fees will be charged on a sliding scale, and may be paid through health insurance, Medi-Cal and Medicare.

"The program intends to provide quality health care at reasonable cost to people who need it, especially those who in the past have not had access to it," health center officials said.

Interested persons can contact Ms. Virginia Escobar, chairperson of the Los Banos Health Task Force, at 828-1540.

"I would like to express my gratitude to the Family Health Center Nueva Esperanza for the valuable health services they have provided to this community during the past several years. Without your continued assistance, I fear that health care for many in our community would suffer"

**Elmer K. Austin, Mayor,
City of Los Banos**

Merced group will

Closure of two health care clinics in west Modesto and Empire will be stayed off for at least three months.

The clinics, operated by the Stanislaus County Medical Society, were to lose their federal funding at the end of this month.

But the Merced Family Health Center, which is displacing the medical society in operation of another center in Patterson could use some of its federal grant money to pay staff salaries in Modesto and Empire as well. Gil Tunison, of the

Federal Department of Health, Education and Welfare told Stanislaus County Board of Supervisors Tuesday.

"I assure you now I can put enough pressure on the Merced group to pick up staff salaries for a short period of time . . . three to four months," Tunison pledged.

The medical society has been operating the centers as nurse-run clinics, a project which began years ago to provide health screening and referral services to pri-

Land, oh precious land! There were some very tough times in the early

"As a Hispanic in our community, former migrant family member as well as Hispanic Supervisor, I am particularly aware of the necessity and importance of the Center to Merced County. With medical coverage and care to our local community being so fragile and more cut-backs on the horizon, the importance of MFHC becomes more important."

Gloria Cortez Keane, Merced County Supervisor, District One

Mike over two clinics

physicians for migrant workers.

Over the years the number of migrant users has declined, and federal regulations have been changed. The changes included a transition to doctor staffed clinics and establishment of consumer groups, made up primarily of people using the clinics, as policy makers to control operation of the centers. The medical society opposed both changes and was "terminated," as Tunison put it, as the grant recipient for operating the clinics.

He said he authorized a \$190,000 payment to the Merced group Monday to provide low income health care on the west side of the county. He said the Merced group would change its name and bring Stanislaus County residents into the policy making board to reflect its new, regional responsibilities.

Initially the HEW funding did not include provision for continuing the Empire and west Modesto clinics, but an appeal launched by the Rev.

1980's. The local school district in Merced wanted to take our land by Eminent Domain for a much needed elementary school. Front page news, picket signs, personal attacks, and such dominated the community for

several months. The clinic, still in its infancy, had dreams of health care expansion, too!

1982

20 years

Employees were reaching their ten-year anniversaries in 1982 - Olga Villa Padron, Izzy Ramirez, Debbie Daguerra,

Burnett Cole. Some were beginning a long relationship - Drs. John Aleman and Sal Sandoval, now regarded as prominent community health center clinicians, P.A. - Jerry Lewis, Data Processing Manager - Theresa Rodriguez, Personnel Director - Jessie Rodriguez, Landscape and Facility Manager - Frank Zamarripa, Medical Assistant - Dee Healy, Medical Records Technicians - Chris Alvarez, Lou Martinez, Linda Lierra, Beatriz Servin, Michele Cutler, Silvia Rodriguez, Tillie Ballez, Jeanett Gonzalez, Virginia Marez, Gloria Meskus, Josephine Elie, and Ying Moua. What wonderful people!

"Merced Family Health Center's commitment and responsiveness to those who are often overlooked in our current health care system has filled an important need in our community. I commend Merced Family Health Center's for its dedication to delivery of quality health services".

**Gary A. Condit, Congressman,
18th District, California**

Federal cuts

Clinic loo jeopardi

By NANCY NEHER
Bee staff writer

A pact signed last month by California and the federal government to make long-term, low-interest loans available to the state's rural health clinics could become meaningless if proposed federal budget cuts come to pass, said Michael Sullivan, Merced Family Health Center administrator.

The agreement between the state Department of Health

made from state pro money fo expenses.

But Su turvy situ budget o ment mee

We returned to Stanislaus County in 1987 to reassume the management of two health centers, one in Modesto and one in Patterson. Both communities were very medically underserved. Our goal was to stabilize, expand the services, and build new facilities.

Dos Palos Health Center has opened

DOS PALOS — Merced Family Health Centers Inc. announces the opening of its sixth medical facility, Dos Palos Health Center, 2765 Blossom St.

Tours, a ceremony and refreshments are planned for the grand opening from 3:30 to 5:30 p.m. Feb. 13. Guest of honor will be Assemblyman Rusty Areias, D-Los Banos.

"It is of tremendous benefit to our community to have such an organization as Merced Family Health Centers in existence. The problems of the poor and medically underserved are clearly evident in Merced, and were added to in the last few years by the arrival of more than 10,000 Laotian refugees".

**James R. Lindsey, Mayor,
City of Merced**

1989

In 1989, we bought a building in Modesto and renovated it to a new medical clinic. With FQHC and Sierra Health Foundation funds, we expanded the building to include six additional exam rooms,

Campus completed a new and very

In 1992, the corporation invested in a five-year-old medical office building in Dos Palos which is adjacent to the local hospital. The "new" Dos Palos Health Center contains six exam rooms, allowing for at least 2 full-time clinicians to practice in the small farming town of 4,000.

"Merced Family Health Centers play an important and necessary role in the community by providing quality medical service to people of all ages. More importantly, the centers provide comprehensive care for citizens regardless of financial, cultural or linguistic barriers."

**Sal Cannella, Assemblymember,
26th District**

Yolanda Walker with patients

Dental Care has always been a high community need since most area private dentists do not accept Denti-Cal. In 1992, in cooperation with the state office of Primary Care and the City of Merced, we were able to expand dental services in Merced by adding five additional operatories. A second full-time dentist has been hired and a third will join the program next year.

Health center gets high marks

The Merced Family Health Centers Inc. has received the highest ranking available to any community health center across the country.

This evaluation is performed annually on all health centers in the country.

The criteria evaluated include

compliance with all federal regulations, especially standards of performance such as low administrative costs, quality health care assurance plan, scope of clinic services, need for services and overall efficiency of operation.

The agency provides a full range of medical and dental

health care services, as well as health education programs aimed at the prevention of AIDS, nutrition education and infant mortality reduction.

The Merced Family Health Centers network serves Merced, West Modesto, Patterson, Los Banos, Dos Palos, and Planada.

attractive 5,600 square foot clinic. Space is allocated almost equally between our clinician team of two OB/GYNs and two Nurse Midwives, and Perinatal Case Management staff.
